Summary

Overview

A highly-creative, fast-learning and computer-literate individual with a Bachelor Degree B.E (ECE) and over 3+ years of experience User Interface Development, Responsive Web Design, Application Design, Developing valid cross-browser cross-functional Web Applications with a growing passion for opensource and Java Script Frameworks.

My Technical skills are: I am proficient in Front End Development Technologies such as React JS, Redux, Node.js, JavaScript, jQuery, JEST, Cypress, HTML/HTML5, CSS/CSS3, Bootstrap, Material UI, Mongo db.

Core Skills:

Experience in all phase of SDLC like Requirement Analysis, Implementation and Maintenance, and extensive experience with Agile.

- Extensive knowledge in developing single - page applications (SPAs) using React
- Experience in using React Components, Forms, Events, Keys, Router, Hooks, lazy loading etc.
- Familiar with Redux and Context for Global state management.
- Have used Formik Library for validations to keep track of values and validation errors.
- Experienced in working with Node.JS, Express Js, middlewares and mongo DB.
- Have written Unit Test Cases for Front end Components using JEST AND Cypress.
- Experience in Node environment using NPM, Grunt and Webpack.
- Involved in writing application level code to interact with APIs, RESTful Web Services etc
- Good Web Application debugging skills using Chrome Developers Tool and Firebug.
- Good Experience in Bug tracking tools like JIRA.
- Experience in Version Control tool like GIT for Source Code version management.
- Experience in Jenkins, and Altus for deployment.
- Involved in daily SCRUM meetings to keep track of the ongoing project status and issues.
- Good communication skills, ability to work well with cross-functional teams.

Experience

Senior Software Engineer

Reflections Info Systems

Jul 2021 - Present (10 months +)

Banking industry by bringing a traditional credit product - the installment loan - online and we've been on

the fast track ever since. We are one of the first fintechs to acquire a national bank charter, which has transformed our business economics and introduced all new capabilities, and now others are following our lead, validating the strength of our model. We are one of America's largest providers of unsecured personal loans, originating more than \$70 billion in loans to our nearly 4 million high-FICO, high-income members and helping them save millions on their cost of credit. And we're just getting started.

- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Have been working as a developer and have handled the front-end team in guiding them and gathering the requirements required for developing the application.
- Involved in Agile methodologies and full software development lifecycle of Designing, coding, testing, debugging and support.
- Helped the Manager in writing Support Handover Document required for the project.

Software Engineer

WebManufact

Dec 2020 - Jun 2021 (7 months)

Project #1: MyPackageforwarder (03/2021 - Present)

Link - <http://mypackageforwarder.com/>
